SUMMARY

Engineering focused Full Stack Web Developer with 1+ year of hands-on experience specializing in architecting and scaling AI-integrated, production-ready web platforms from early concept to real world deployment. Demonstrated expertise in embedding intelligent decision-making, automation, and analytics into modern web architectures.

WORK EXPERIENCE

Technical Workshop Facilitator & Event Volunteer

2025 – Present

- Conducted technical workshops on modern web development, JavaScript, React, and frontend technologies for students.
- Volunteered at multiple technical conferences, coding events, and developer meetups, assisting with event coordination and attendee management.
- Collaborated with organizing teams to plan and execute hackathons, technical competitions, and innovation events.

TECHNICAL SKILLS

Frontend ReactJS, NextJS, Tailwind CSS, TypeScript, React-native, Expo
Animation GSAP, Lenis, Three.js, Lucide.js
Backend NodeJS, Express, FastAPI, REST APIs, WebSocket
Database MongoDB, Supabase, Firebase, PostgreSQL
DevOps Docker, CI/CD Pipelines (GitHub Actions), AWS, GCP
UI/UX Figma, Google Stitch, Payment Gateway Integration (Stripe, Razorpay)
Language C, Java, Javascript, ML, Kotlin

PROJECTS

CivicLedger (Decentralized Governance Platform)

- Architected a platform that transforms government policies into executable smart contracts on the Internet Computer Protocol (ICP), ensuring tamper-proof, automated policy execution.
- Implemented real-time transparency and citizen participation modules with on-chain tracking and community-driven governance decisions.

JanMitra (AI-Powered Community Assistance Platform)

- Built a smart web application helping citizens access government schemes, complaint management, resume analysis, and academic/event tracking in a unified portal.
- Integrated real-time campus navigation via QR scanning and NLP-driven scheme recommendations to improve accessibility and institutional communication.

RoadSense (Smart Real-Time Road Anomaly & Safety Intelligence)

- Built a crowd-sourced real-time platform that automatically monitors and maps road infrastructure quality by tapping into standard smartphone sensors (accelerometer, gyroscope, and GPS).
- Processed sensor streams locally using statistical anomaly detection, streamed data to a centralized Supabase database, and delivered an interactive dashboard with real-time hazard mapping, administrative audit controls, and rich analytical insights.

ACHIEVEMENTS

- **1st Runner-Up** (CU Flow J-JAM) – Chandigarh University
- **1st Runner-Up** (Hack with Uttar Pradesh – Blockchain Track)
- **1st Prize** at Innovate X

EDUCATION

B.Tech (CSE Core), Chandigarh University

Uttar Pradesh

Intermediate (CBSE) | New Heights School, Hardoi

July 2025 – Present

Uttar Pradesh

Matriculation (CBSE) | St. Xavier's High School, Hardoi

March 2023 – March 2024

Uttar Pradesh

March 2021 – March 2022
